SHIVANSH GHILDIYAL

Software / AI-ML / Data Analytics Internships

Faridabad, Haryana, India | shivanshgh10@gmail.com | LinkedIn | GitHub | Credly | Google Skills

PROFILE

ECE undergraduate and developer with hands-on experience building software and AI/ML projects. Focused on machine learning, NLP, generative AI, data analytics, and web development, with practical experience taking projects from idea to working implementation.

EDUCATION

B.Tech — Electronics & Communication Engineering | UIET, Kurukshetra University | 2024–2029 (Expected)

Second-year student building a foundation in electronics and communication while focusing independent development work on software, AI/ML, and web development.

EXPERIENCE

Data Analytics Intern — BharatCares® · IBM SkillsBuild | Aug 2026 – Present

- Working through the IBM SkillsBuild Data Analytics with AI internship, building practical experience in data analytics, AI, machine learning, and data visualization.

Machine Learning Intern — Navodita Infotech · Remote | Mar 2026 – Apr 2026

- Built an NLP text-classification project using Python, NLTK, and spaCy, gaining hands-on experience with machine-learning concepts and models.

PROJECTS

TruthLens — AI Misinformation & Credibility Intelligence Platform

Tech: Python, Scikit-learn, Streamlit, TF-IDF, Gemini LLM, Tavily API

- Built an AI-powered platform that evaluates claims and articles using a combined credibility-scoring pipeline.
- Developed a TF-IDF + Logistic Regression classifier and integrated linguistic signals, live evidence retrieval, and Gemini LLM-based judgment.
- Designed the scoring pipeline, trained the classifier on a balanced dataset, integrated external APIs, and debugged caching, class-imbalance, and API-integration issues.
- Built a working Streamlit demo for the Next Gen Innovators Hackathon.

JARVIS — Local AI Assistant

Tech: Python, Ollama, Playwright, faster-whisper, pyttsx3

- Built a Windows-native voice assistant using a local Ollama model with tool-calling capabilities.
- Integrated Playwright for browser automation, faster-whisper for speech-to-text, and pyttsx3 for text-to-speech.
- Implemented a background wake-word listener capable of automatically launching the assistant at system startup.

TECHNICAL SKILLS

Programming: Python, C/C++ | **Web:** HTML, CSS, JavaScript | **AI/ML:** Machine Learning, AI/LLMs, Generative AI, NLP, Prompt Engineering | **Data:** Data Analytics, Predictive Analytics, Data Management, Data Visualization, Microsoft Excel | **Tools:** Git, GitHub, VS Code, Streamlit | **Soft Skills:** Problem Solving, Critical Thinking, Adaptability, Management

CERTIFICATIONS & ACTIVITIES

IBM SkillsBuild — Data Analytics with AI (Aug 2026) | **Generative AI Essentials: Using LLMs to Work with Data — Badge** (IBM SkillsBuild, Aug 2026) | **Data Fundamentals — Badge** (IBM SkillsBuild, Aug 2026) | **Python** (HackerRank, Aug 2026) | **5-Day AI Agents: Intensive Vibe Coding Course** (Google, Jul 2026) | **Foundation Course on AI Readiness** (IICT · Google & YouTube, Jul 2026) | **Google AI Essentials** (Google · Coursera, Jun 2026) | **Google Prompting Essentials** (Google · Coursera, Jun 2026) | **McKinsey Forward Badge** (McKinsey.org, Jun 2026) | **Data Visualization: Empowering Business with Insights** (Forage/Tata, Sep 2025).

Hackathon: NextGen Innovators Hackathon 2026 — Designed and built TruthLens, an end-to-end AI misinformation detection and credibility platform.

Quiz: QuizOff 2026 — India's Biggest AI Quiz (CampusCrew / Unstop, Jul 2026).
